

Market Place

Market Place E-commerce Application.

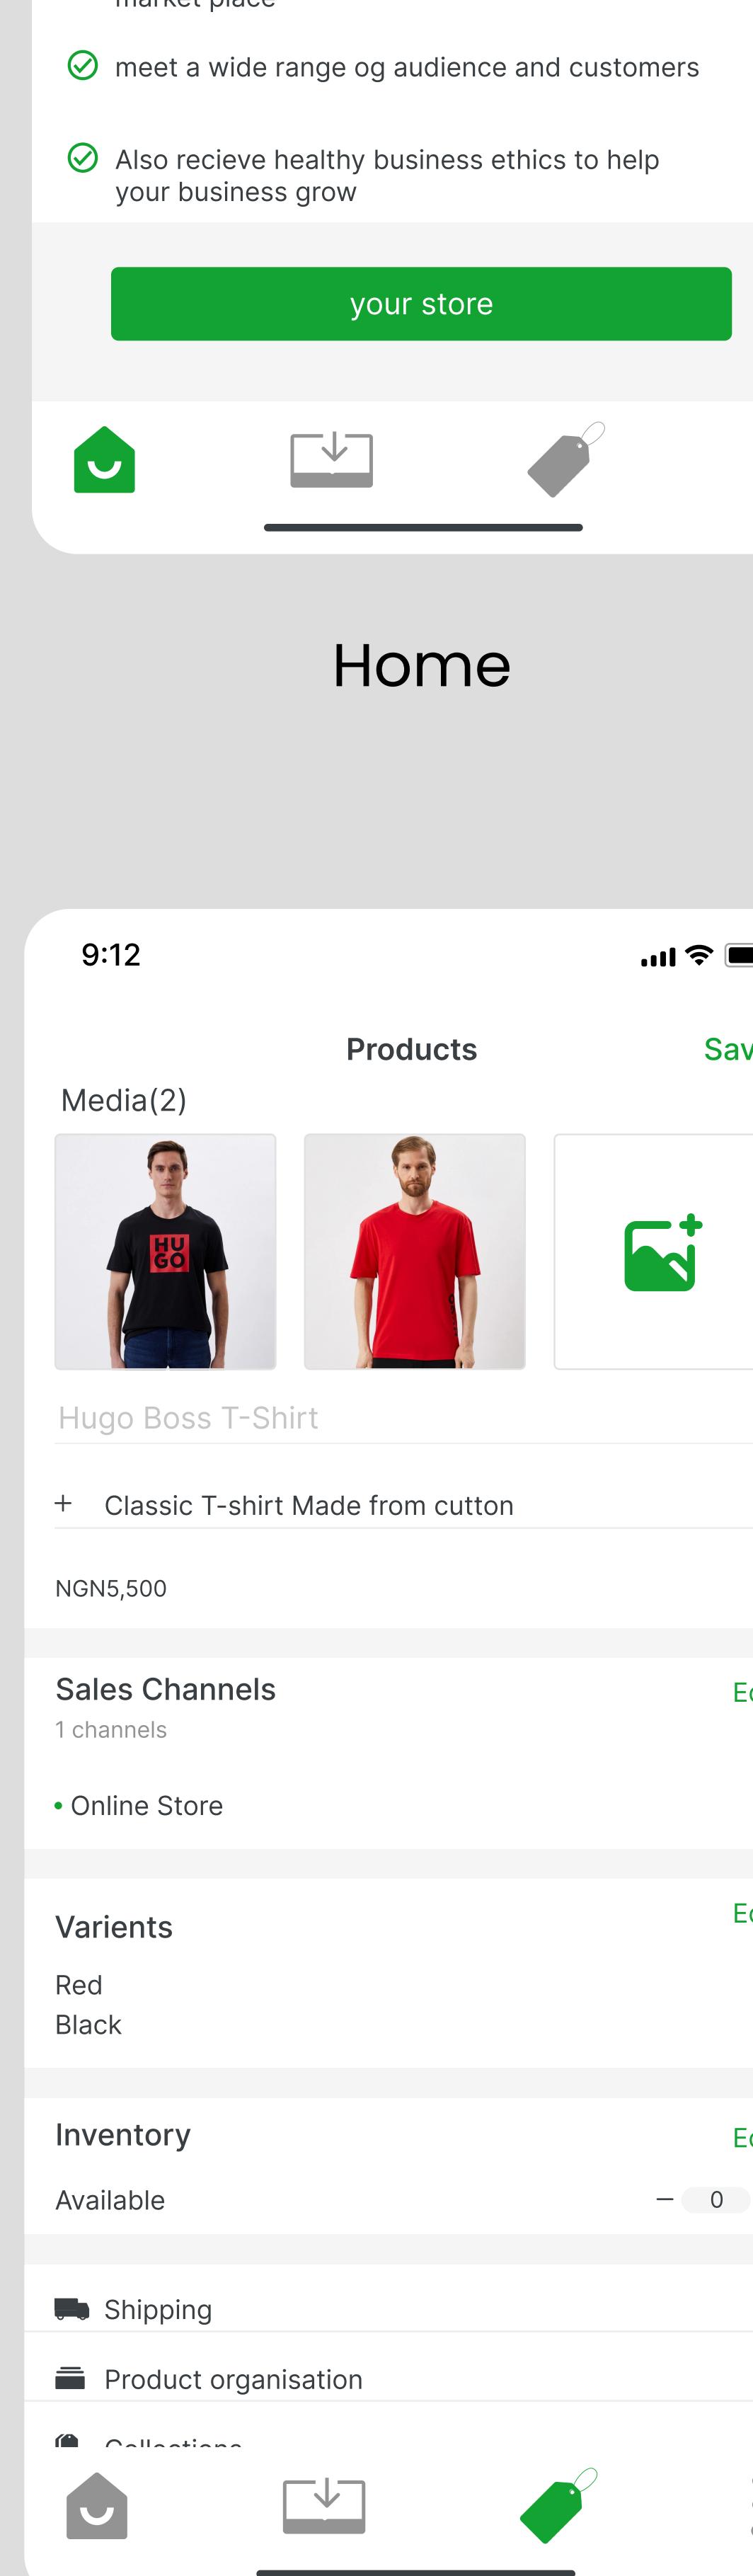

Allows users to upload their product seamlessly and engage with a wider audience

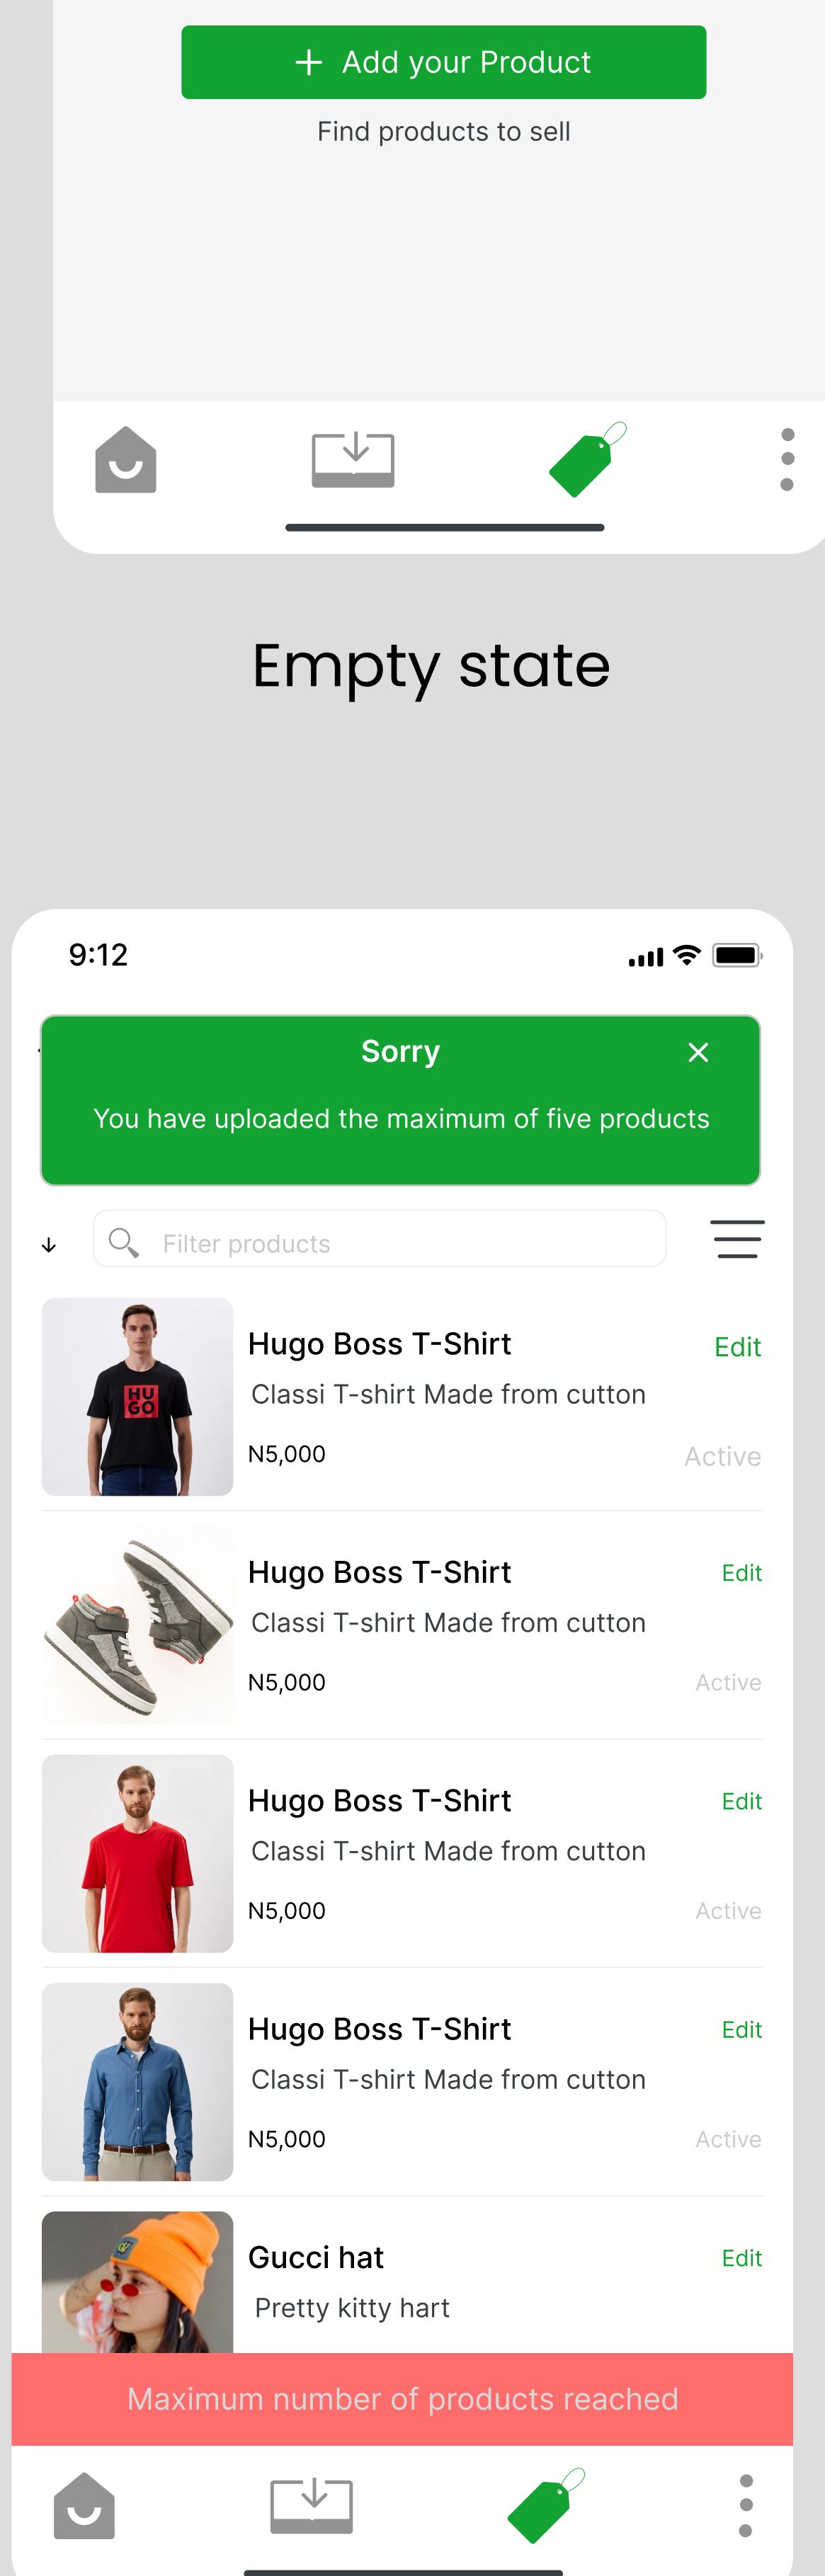

The User opens application and Navigates to the home screen to access the various features. The major action buttons leads to the product page which allows the user to add n see products and add new products

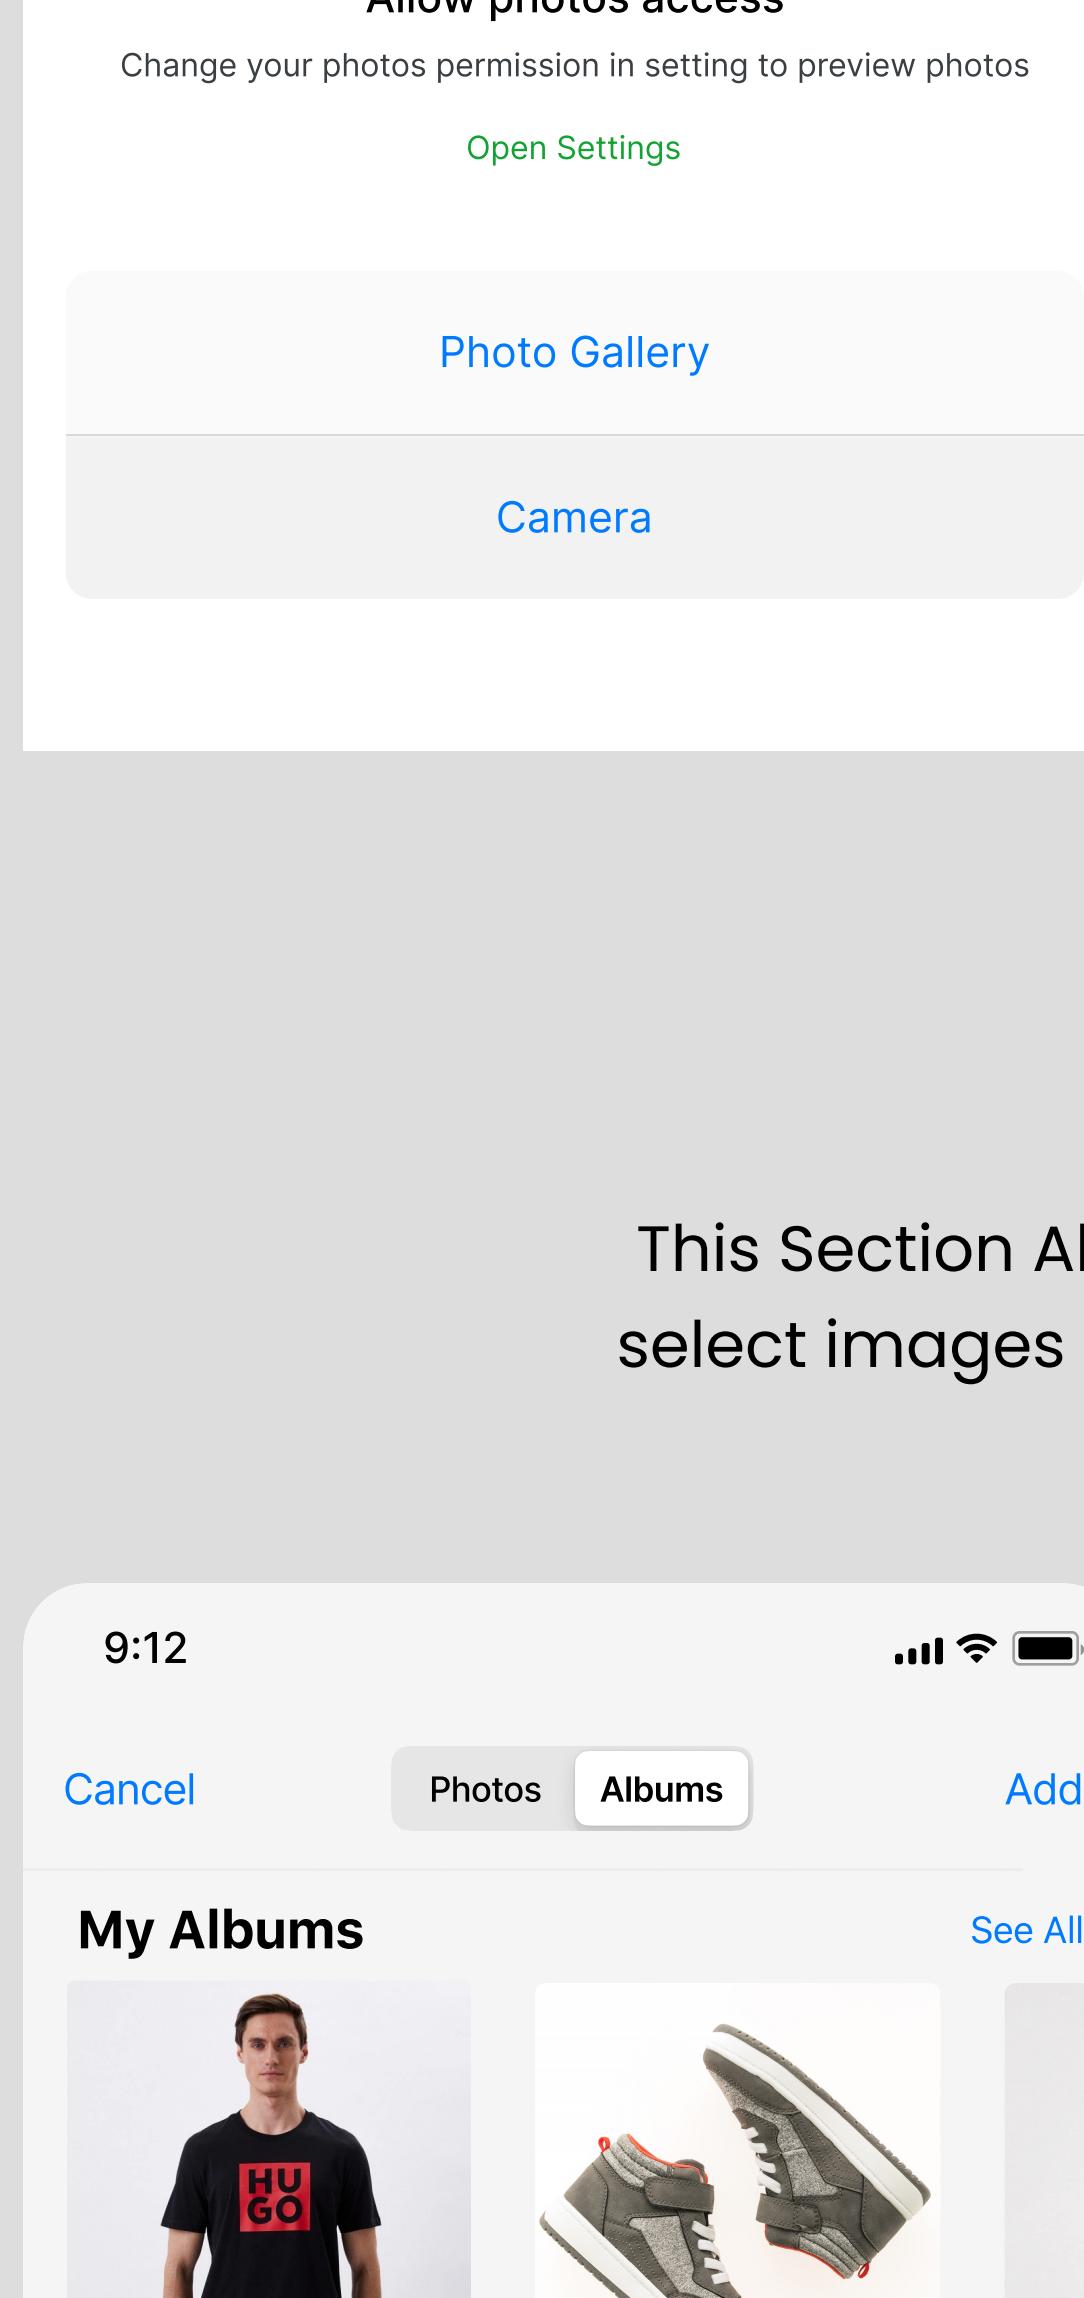

Open App

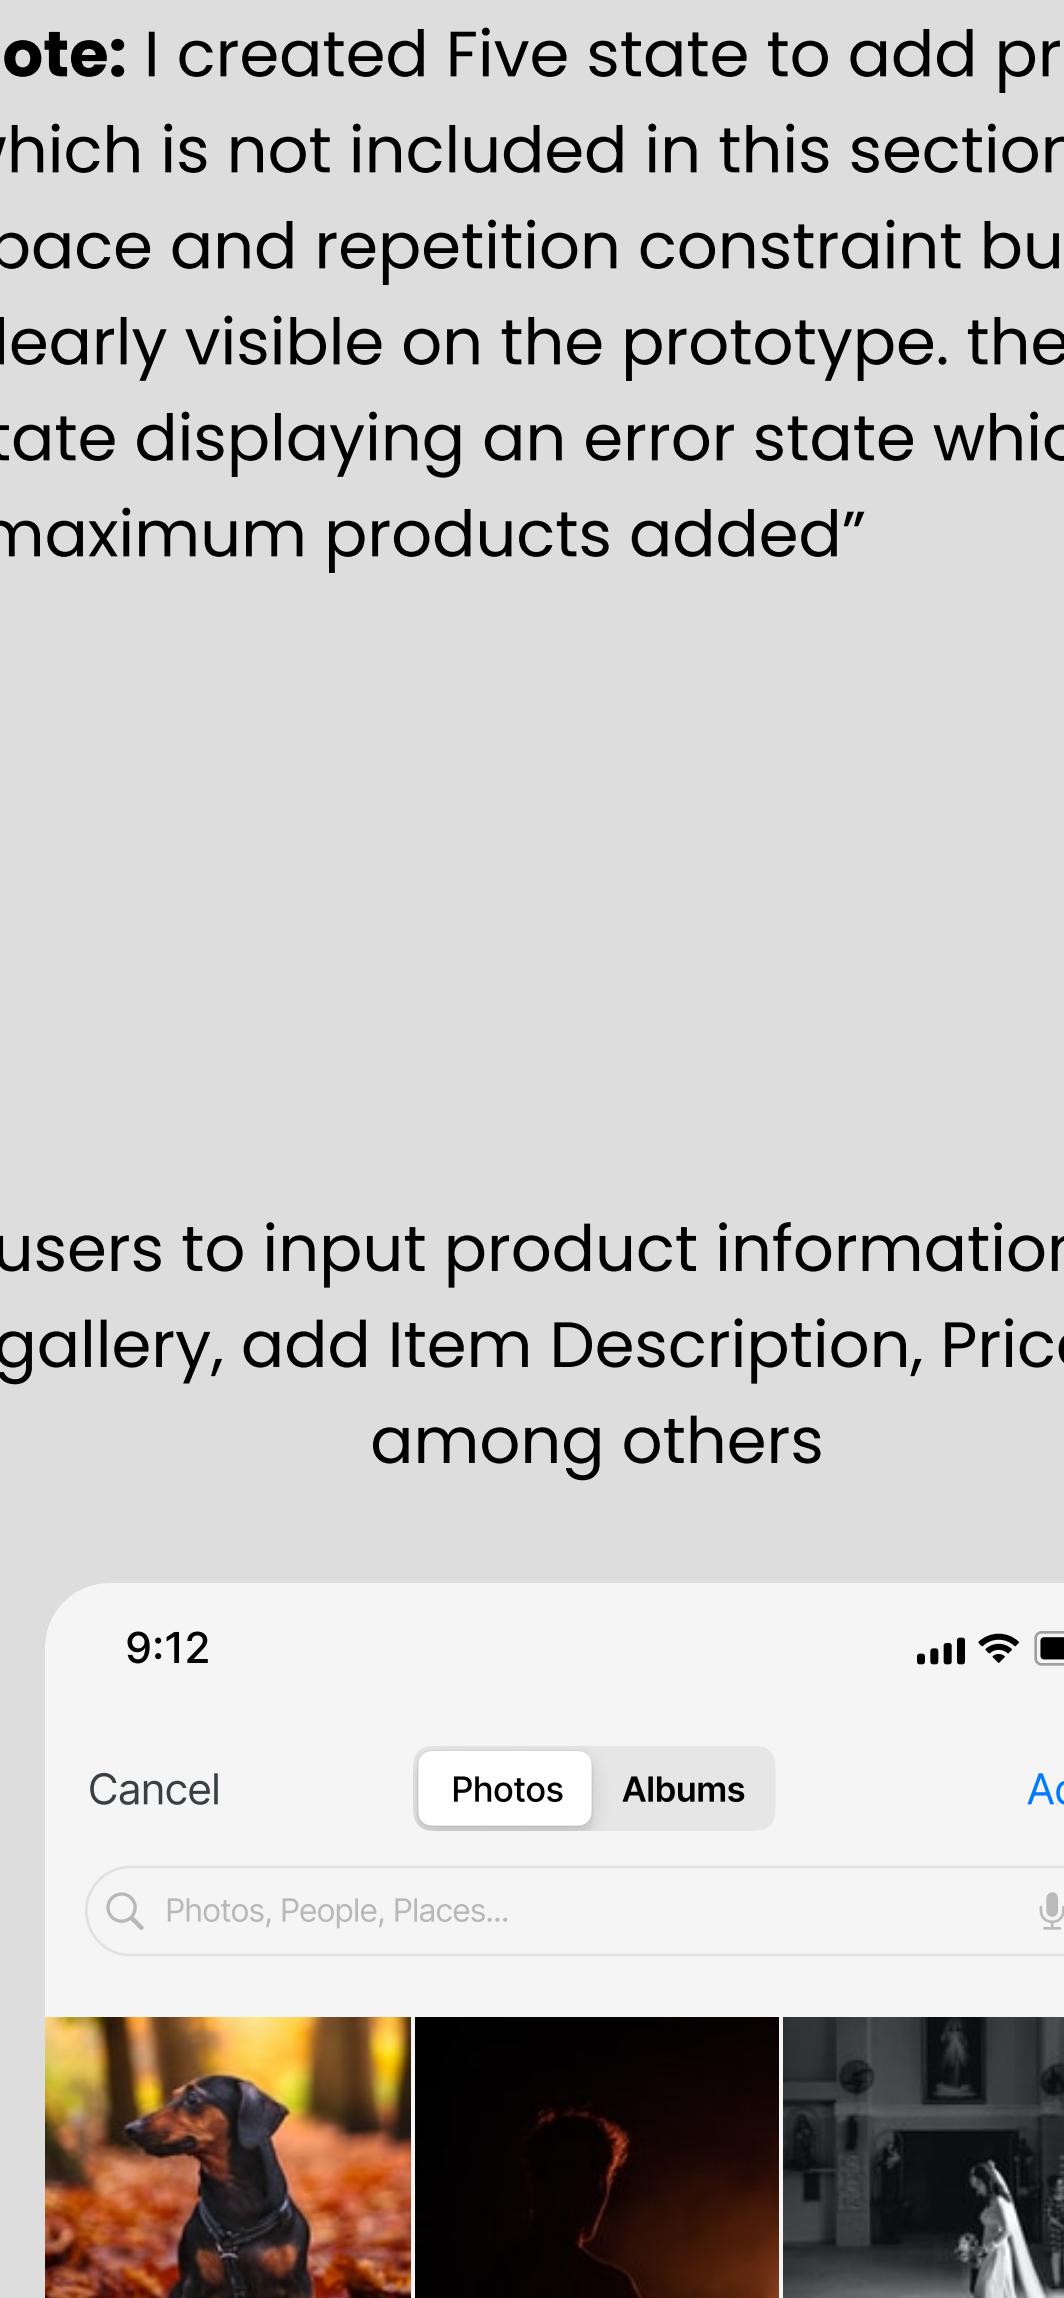

Home

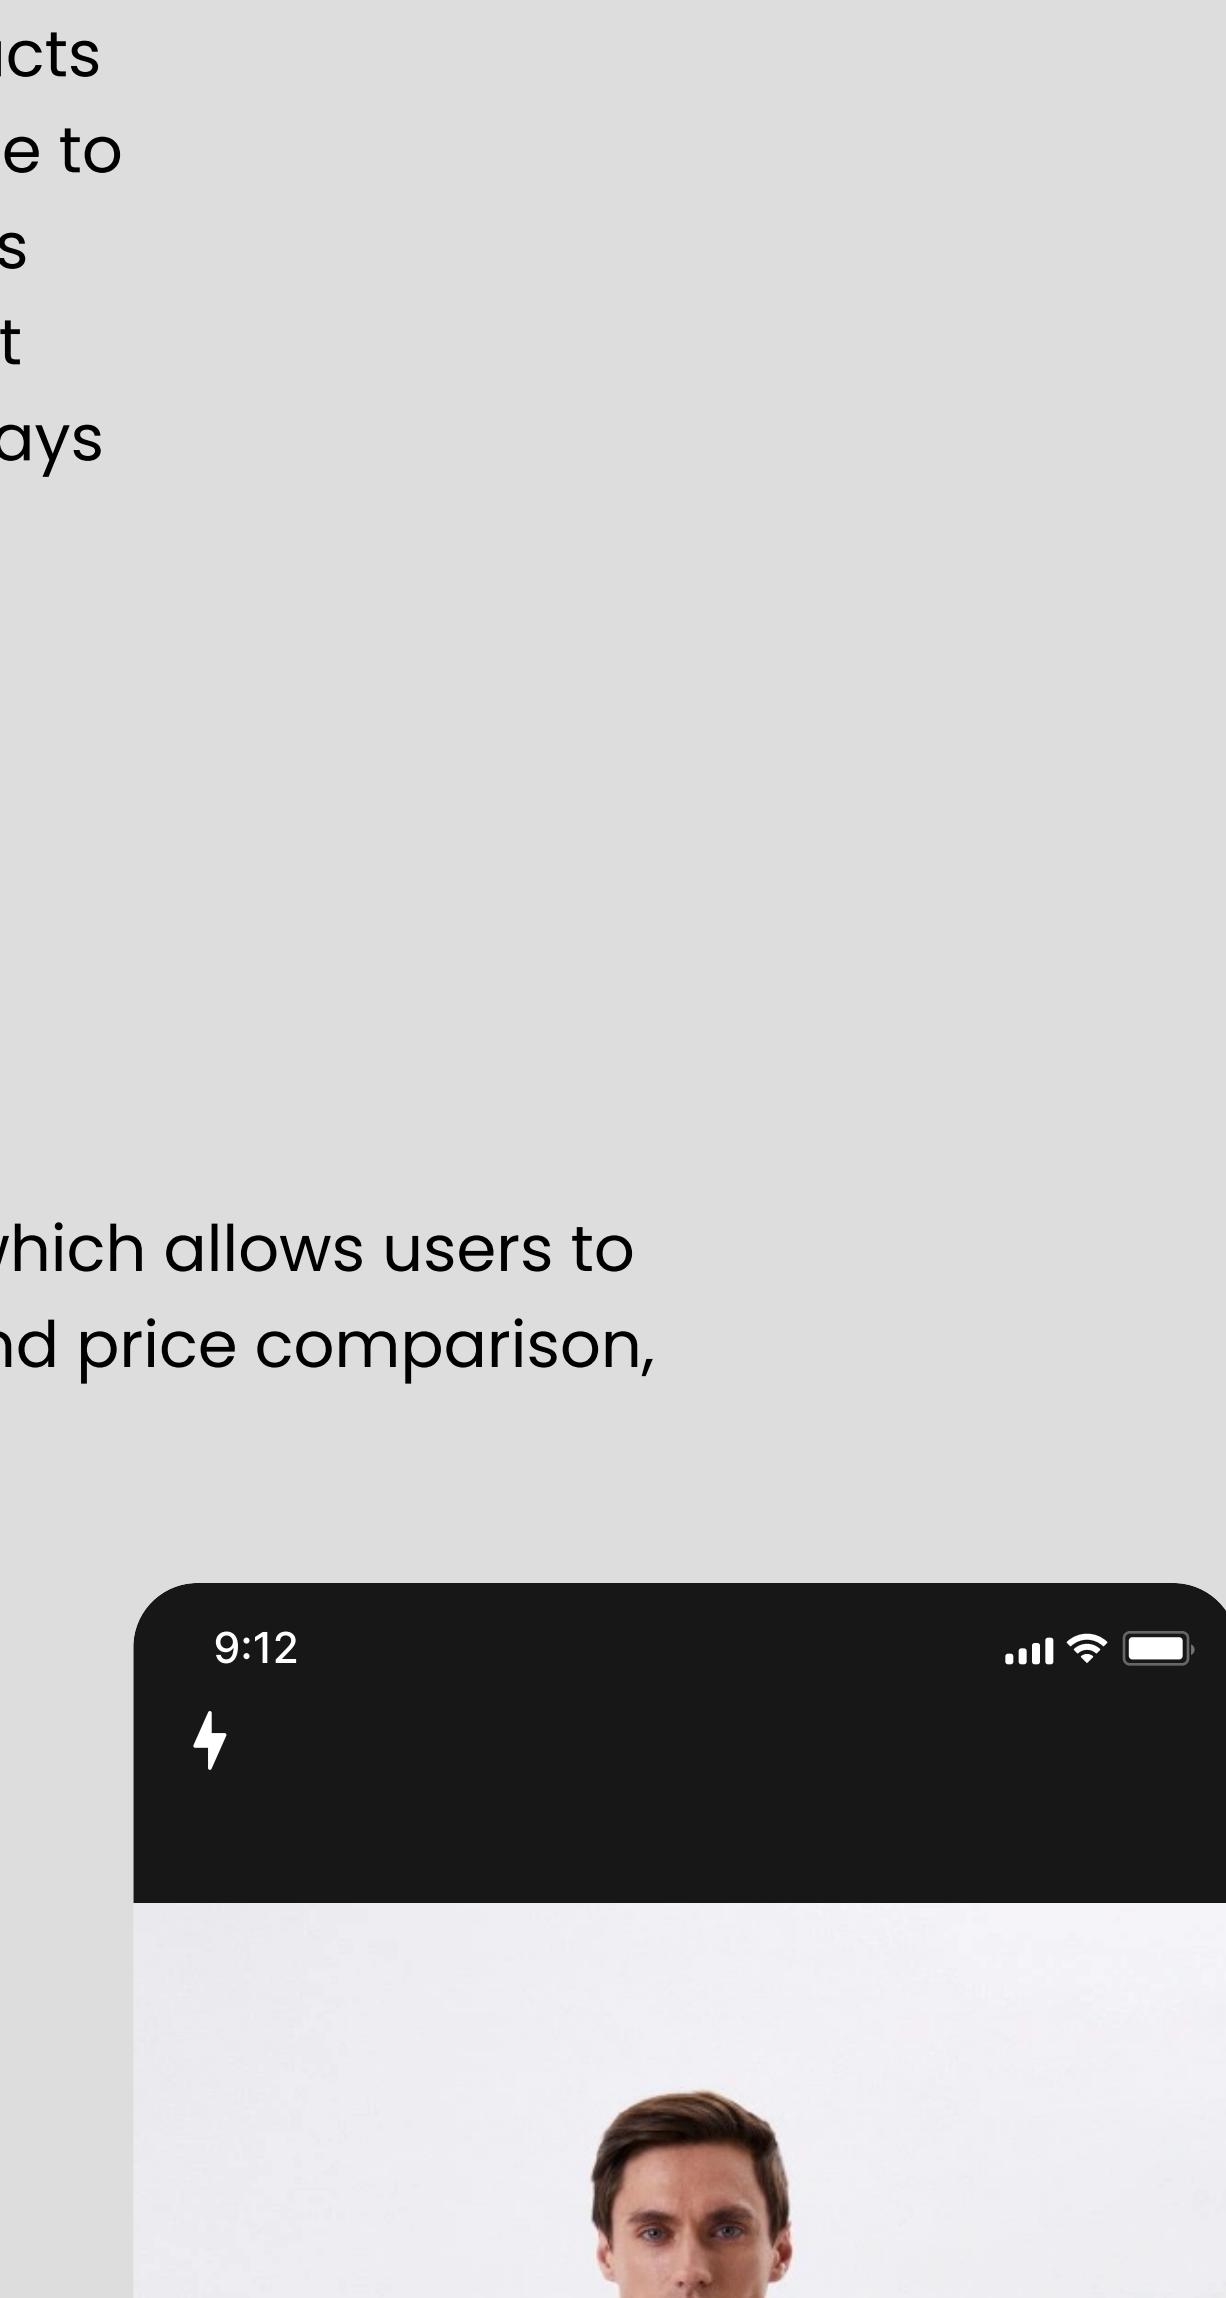

Empty state

Select Image/Input details

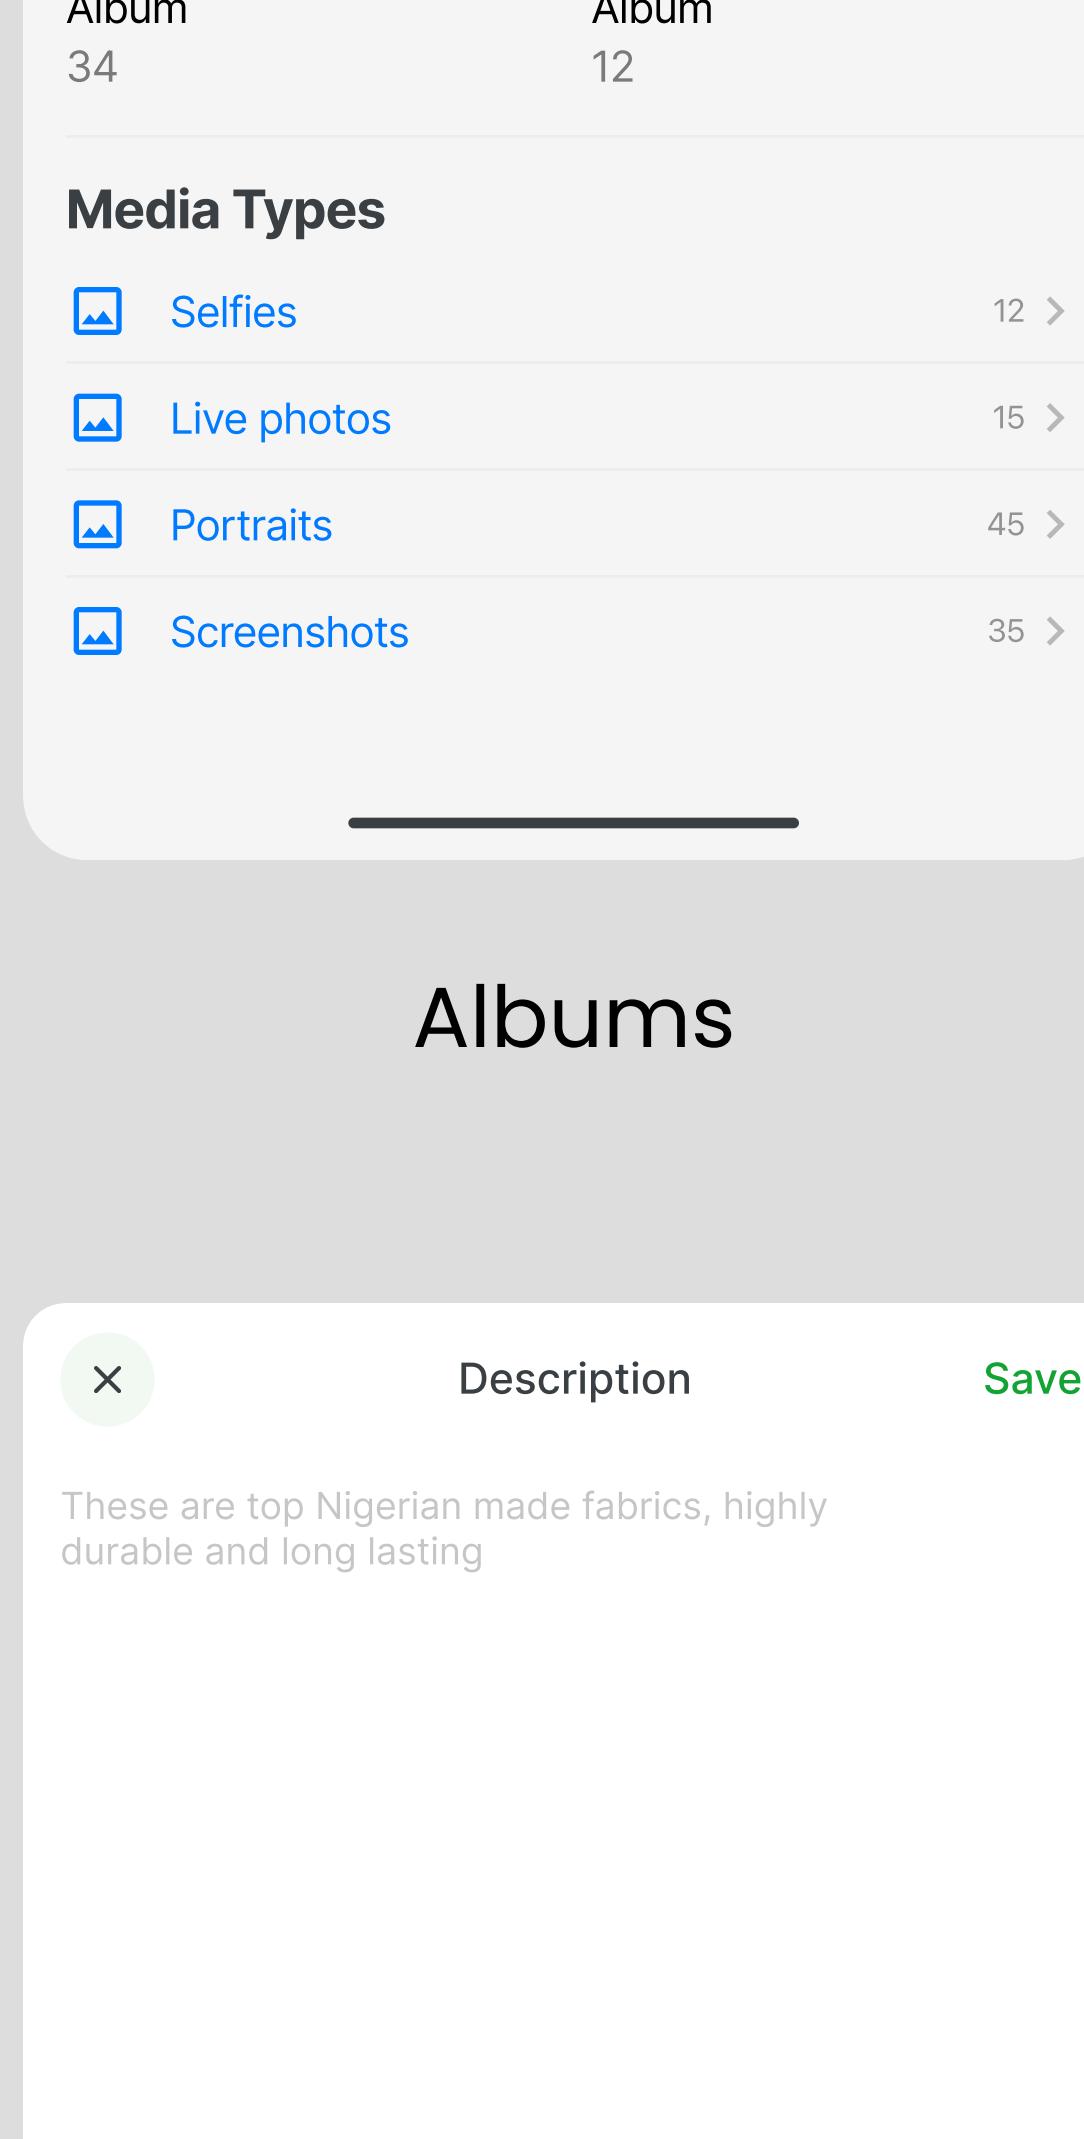

Save Product

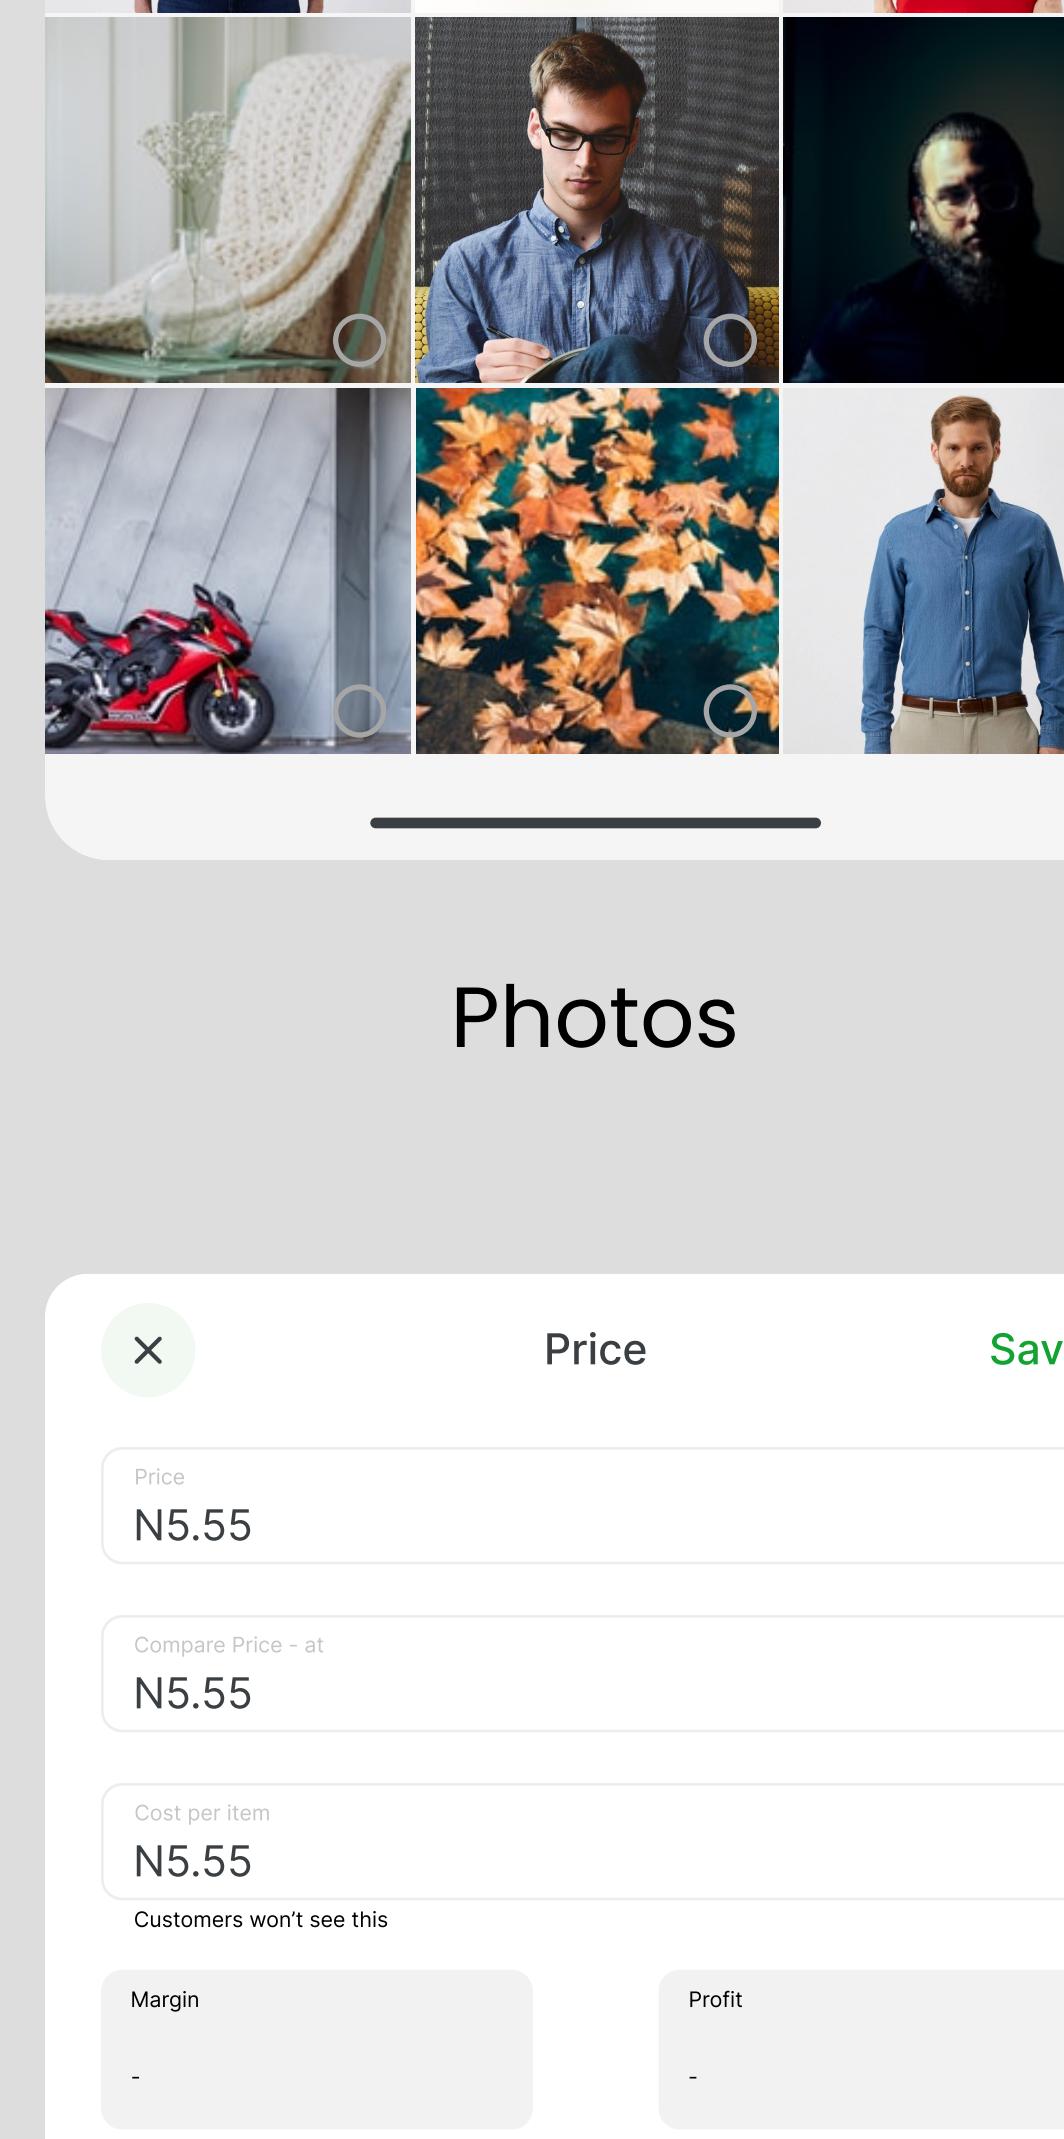

Maximum Product Added

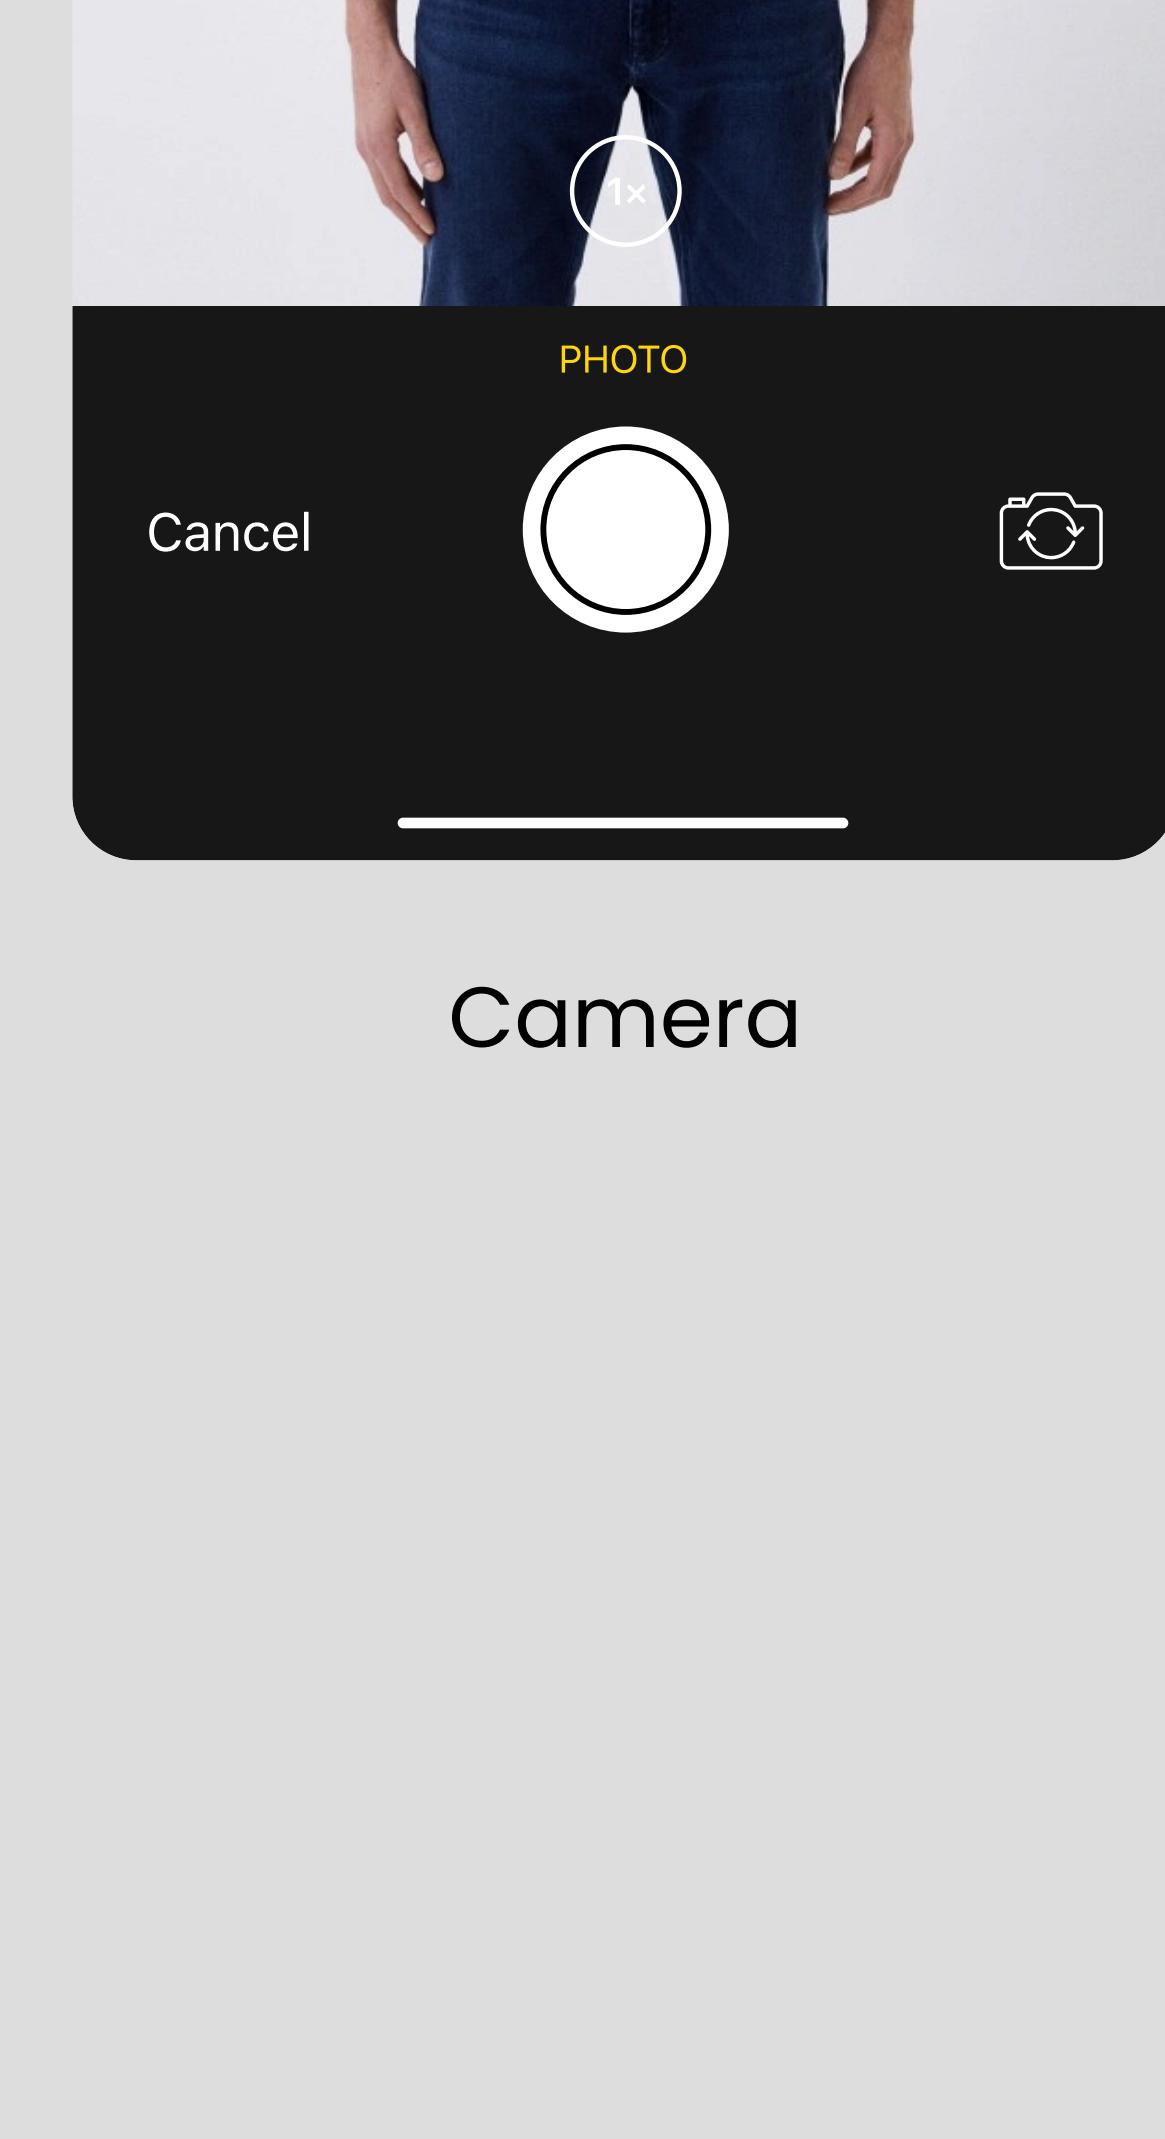

Note: I created Five state to add products which is not included in this section due to space and repetition constraint but it is clearly visible on the prototype. the last state displaying an error state which says "maximum products added"
